Punch a hole

↓

•

【Perforating guide】

Make a mini Edomaru kite

What you need

◆Kite string (60 cm)
◆Bamboo strips (for tying the kite string to)
◆Sticky tape/glue
◆Scissors/penknife
◆Hole punch or other perforating tool
 (for punching holes in the paper)
◆Sheets 1 and 2 printed out on A4 paper
 Sheet 1: Print【Kite】(3 designs) and【Perforating guide】on thick paper (about the thickness of a postcard).
 **Sheet 2**: Print【Tail】on regular paper.

Sheet 1　　　　Sheet 2

Ask a grown-up to help you with the tricky bits!

Steps:

① Cut along the cutting lines (——) of Sheet 1 【Kite】(3 designs) and【Perforating guide】, and Sheet 2【Tail】.

② Place the【Perforating guide】over a【Kite】card and use a hole punch or other perforating tool to punch a hole through the card. ← Ask a grown-up to help you!

③ From the side of the【Kite】card with the picture on it, thread the kite string through and tie a knot on the reverse side. Then, put sticky tape over the knotted string to hold it in place.

④ On the reverse side of the【Kite】card, attach one【Tail】to each side of the bottom of the card. (You can use sticky tape or glue.)

⑤ Take the other end of the kite string that you have threaded through the【Kite】card, wind it around the top of a bamboo strip, then tie a knot.

Finished!
